Yesterday, [6 Edmonton Schools were targeted in school swatting attacks](#) that resulted in school lockdowns. Today we have been made aware that there have been additional Alberta school swatting incidents.

The majority of swatting incidents are made from Internet telephone services that make the calls from an unknown number. In order to better protect our schools, students and staff from being impacted, WRSD's telephone system **will only accept inbound calls with the caller ID identified.**

Callers who intentionally block their caller ID or use a telephone service that does not identify their callback number will be directed to an automated response that indicates they should enable caller ID and try their call again.

For more information, please contact WRSD Division Office at 403.845.3376.
